

If you encounter errors with missing files. **Files not found error** during executing following line->
from panns_inference import AudioTagging

Download the file and place them in your data folder

```
658     if _is_path(name_or_buffer):
--> 659         return _open_file(name_or_buffer, mode)
660     else:
661         if "w" in mode:

File ~\Pinecone5\pc5_env\Lib\site-packages\torch\serialization.py:640, in _open_file.__init__(self, name, mode)
639 def __init__(self, name, mode):
--> 640     super().__init__(open(name, mode))

FileNotFoundError: [Errno 2] No such file or directory: 'C:\\Users\\VENOEN\\panns_data\\Cnn14_mAP=0.431.pth'
```

This is pretrained model file.

Can be downloaded from hugging face

Pointer size: 134 Bytes

Size of remote file: 327 MB

[Raw pointer file](#)

Git Large File Storage (LFS) replaces large files with text pointers inside Git, while storing the file contents on a remote server. [More info](#).

During importing panns_inference you might encounter an error related to another file missing. I have uploaded the file. Usually, the error itself will show the URL to the file.

Place both files in your pans_data folder. Folder should be created during installation of panns_inference library
